Evolve

Evolve from above, showing the continuous infinity twist.

A$500 • Available

Life twists and turns. We evolve. Thomas Westra’s first bronze casting takes the form of an infinity twist, a continuous loop that turns back through itself.

Cast bronze from reclaimed sheet offcuts, polished and waxed.

14 cm long × 4.5 cm wide × 3.7 cm high. Round profile: 1.6 cm diameter. Weight: 0.5 kg.

Thomas melted offcuts from earlier bronze sculptures and sand-cast the form in two halves. He then welded the halves together, polished the bronze and finished it with wax.

Evolve from casting to finish

The front view shows the rise and fall of the twisted profile.

Bronze sheet offcuts from earlier sculptures are melted for casting.

The open sand mould shows the impressions that shape the bronze.

One bronze half in the freshly opened mould.

The two cast halves before welding and polishing.
